

LATRINES FOR LIFE

SANITATION PROJECT IN CAMBODIA SPONSORED BY SOLANA BEACH ECO ROTARY CLUB

ABOUT CAMBODIA

Cambodia is the country in Southeast Asia that borders Thailand to the west and northwest, Laos to the northeast, Vietnam to the east, and the Gulf of Thailand to the southwest, the geography of Cambodia is dominated by the Mekong River (Tonle Mekong) and Tonle Sap lake.

Cambodia has an area of 181,035 square km and lies entirely within the tropics, between latitudes 10° and 15° N, and longitudes 102° and 108° E. It has a 443 km coastline along the Gulf of Thailand.

Cambodia's climate, like that of the rest of Southeast Asia is dominated by monsoons, which are known as tropical wet and dry because of the distinctly marked seasonal differences.

Cambodia has a temperature range from 21 to 35 °C (69.8 to 95 °F) and experiences tropical monsoons. Southwest monsoons blow inland bringing moisture-laden winds from the Gulf of Thailand and Indian Ocean from May to October. The northeast monsoon ushers in the dry season, which lasts from November to March. The country experiences the heaviest precipitation from September to October with the driest period occurring from January to February.

Tep Or Chun Village is located in the Khos Khel region of Saang District, Kandal Province. In the villages are several families who do not have toilet facilities. The Solidarity Fund for Rural Development and Latrine For Life (Microloans For Mothers) are coordinating the program, which focuses on rural areas where many poor and unprivileged families have their homes.

Here is the family that has been in desperate need of our assistance.
